THE
HOLLOWAY SEED AND GRAIN
COMPANY.

221 Elm Street,
220 Pacific Avenue.

DALLAS, TEX.

The cut represents a single Plant of Alfalfa, showing how far down the root will go in search of moisture.

ALFALFA.

The best variety for the South, succeeding in almost every situation and bearing a very heavy crop of foliage.

Will bear cutting three or four times a year and stands drouth better than any other clover.

The roots grow down to water, often 15 to 29 feet.

Stock are very fond of it.

It grows and thrives all winter.

We are headquarters for the seed, shipping it in car lots from the growers.

The demand is increasing every year.

We sold over five cars last year.

Price, Bu. . . . \$6.50. \$10.50 100 pounds;
12½ cents pound.

Sow 25 pounds to the acre, in fall or spring. After sowing, the ground should be well rolled.

221 Elm Street and 220 Pacific Avenue,

DALLAS, :: :: TEXAS.

TO OUR FRIENDS AND CUSTOMERS :

IN presenting to you our Annual Catalogue and Price List, we take pleasure in thanking you for the liberal patronage you have given us and respectfully ask you for the continuance of the same for the future.

Nothing for which money is expended makes so large returns as seeds if they are good. Nothing causes greater vexation than worthless seeds. If you wish to avoid disappointment, do not rely on seeds peddled over the country and sold on commission. The chances are against them vegetating. We send out no seeds on commission.

Having done an extensive seed business in Texas, Louisiana and Oklahoma for over a quarter of a century, we know more and can advise our customers better in regard to the kind of seed best adapted to our soil and climate than any of the Eastern seed houses. We test all our seeds and take every precaution by personal supervision, that all seeds sent out by us are reliable, fresh, and true to name. At the same time, we give no warranty in any respect and will not be responsible for the crop. If the purchaser does not accept the seeds on these terms, they must be returned to us and money will be refunded. Our prices will be found as low as any reliable seed house. We guarantee our weights and measures to be accurate.

Our vegetable seeds are shipped direct to us from the largest and most reliable growers in California.

Our Onion seed is raised for us in St. Claire County, California and have proved superior to Northern raised seed. We have scores of letters from the largest onion growers in this and adjoining states who have tried both, and say that they will have none but the California grown seed, as they grow larger and quicker and are better keepers than Northern grown seed. Scores of our customers write us they raised from 300 to 500 bushels to the acre when others who used Northern seed made a failure. It is a mistake of the people in the South to think they have to send North for seed. Many have found this out at a great expense to themselves and are now placing their orders with us for next year's seed. We carry the largest and most select stock in the South.

We are headquarters for Alfalfa Clover Seed, shipping direct from the growers in Colorado and California in large quantities. Our Sorghum, Millet and Kaffir is shipped to us direct from the growers and every bushel is re-cleaned seed and free from Johnson Grass and other injurious weed. Market price.

We carry a full line of grass seed at all times. Our Bermuda we ship direct from the Bermuda Islands, and flower seed we ship direct from Europe, and sell in bulk. Flower seed after they are one year old are worthless. Always ask for bulk seed.

Our firm is the oldest and largest of the kind in Texas and the honest representation made of the seeds offered is appreciated by customers who became familiar with our establishment years ago, their recommendations annually bring us new patrons.

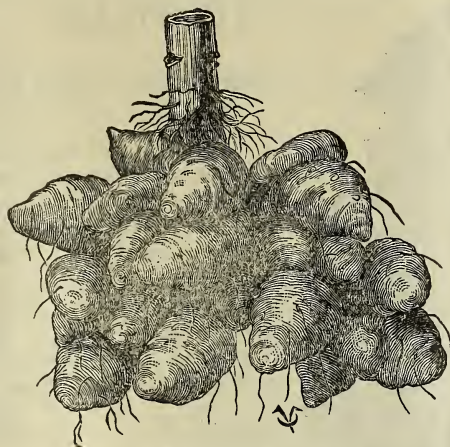

TERMS OF SALE: CASH WITH ORDER.

Remittances may be made at our risk by draft, money or express order or registered letter. We furnish all seed at the price on the following list, postage paid except peas, beans corn, onion sets and other heavy seeds. For all heavy seeds, add 8 cents per pound for postage. Seed ordered by express should give full shipping directions to save delay. When ordering by freight be particular to give name of the road you want them shipped on.

When making out your order be careful to give name and address on the inclosed order sheet, and full shipping directions. We give a discount of 5 per cent on all garden seeds when the order is accompanied by the cash.

A confidence exists between the people and our seeds. An acquaintance and experience of over a quarter of a century of mutual service, employment by us of every known means to give purchaser tested seeds of the highest quality at the lowest price at which they can be produced and sold, certify that patrons not only get the best seeds that grow, but an assortment of varieties it pays to grow in the Southern States.

.. JERUSALEM ARTICHOKES ..

Artichoke Jerusalem.

Yield 500 bushels to the acre.
Plant any time from January to April.

Perfection Seed Sower, \$2 50.

How and When to Plant a Garden to Make it Profitable.

First, plow your garden well in the fall, then give same a heavy dressing of partly decayed stable manure, or fertilizer, in the absence of stable manure, use the ground Bone Dust. By January your ground will be mellow, and will raise almost any kind of vegetable.

What Seeds Should be Planted in the Different Months. This Applies to the South Only.

JANUARY. Sow Turnip, Radish, Cabbage, Beets, Spinach, Parsley, Lettuce, Schallots, Onion Setts, Peas, Horse Radish, Asparagus, Tobacco.

FEBRUARY. Plant extra early Peas, Cabbage, Cauliflower, Lettuce, Spinach, Radish, Mustard, Tomatoes in hot beds.

MARCH. Plant Onion Seed, in drills. The four best kinds for Texas are Prize Taker, Yellow Globe and White Portugal, Pepper, Tomatoes, Corn, Beans, Cabbage, Sweet Corn, Irish Potatoes, bed Sweet Potatoes, Onion Sets, Alfalfa Clover.

APRIL. Transplant cabbage and Tomatoes; plant Watermelons, Cantaloupes, pole Beans and Peas, Squash, Cucumbers, Pepper, sow Sorghum, Millet, Corn, Alfalfa Clover.

MAY. Plant Millet, Kaffir, Corn, Peas, pole Beans, black eye Peas, Cow Peas, Sorghum seed, Milo Maize, transplant Sweet Potatoes, Peanuts.

JUNE. Plant Millet, Sorghum and Kaffir Corn.

AUGUST. Plant for fall garden, Turnip, Cabbage, Radish, Lettuce, Onion Seed and Setts, Spinach, Irish Potatoes, Beets.

SEPTEMBER. Plant Beans, Cabbage, Turnip, Onion Setts, Rye, Barley, Wheat, Oats.

OCTOBER. Onion seed and Setts, Mustard, Radish and Turnips, Wheat, Barley, Oats, Rye, Alfalfa.

Spring Flower Seed-Plant in February and March.

Dwarf Double Sunflower.

Hollyhocks, single and double.

Sweet Williams, mixed.

Hibiscus.

Peonies.

Honey Suckle.

Phlox.

Clematis.

Cannas, mixed.

Ageratum, fine mixed.

Adonis.

Asylum, white and yellow.

Asters, choice mixed.

Balsam.

Baloon Vine.

Carnations.

Candy Tuft.

Madam Gunter's Nasturtiums.
Dwarf Nasturtium.

Chrysanthemum.

Coleus.

Cock's Comb.

Cypress Vine.

Daisies

Morning Glories.

Gourds.

Geraniums.

For-get-me-nots.

Lark Spur.

Balsam Vine.

Moon Flower,

Lobelia.

Marigolds.

Mignonette.

Four O'clock.

Nasturtiums.

Pansies.

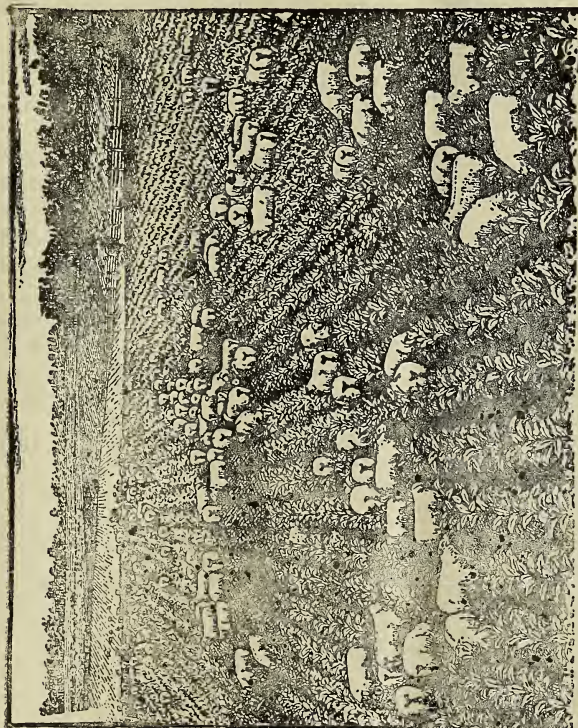

Poppies.

Zinnias.

Verbenas.

STOCK PEAS

Are planted extensively in Texas for stock and for table use. As a fertilizer they have no equal. Plant in April, May, June and July. Large California Black Eye, White Lady Pea, Whippoorwill, Red Ripper, Clay, Unknown, Wonderful. Plant in drills between the corn, or broadcast, one bushel to the acre.

A FIELD OF DWARF ESSEX RAPE GIVEN TO SHEEP FEEDING.

This is an article of Winter and Spring Stock Food that should be raised by every farmer, it is easily grown and resembles turnip in taste and will stand any amount of frost.

RAPE SEED - THIS SEED IS NEW IN TEXAS.

Northern Farmers have been planting it for years for an early spring pasture. Plant in October or February; 6 lb to the acre.

VEGETABLE SEED==General List.

All seeds from this catalogue offered in packets, ounces and $\frac{1}{4}$ lbs., will be mailed free; but in quantities of $\frac{1}{2}$ lb., and upward, of one variety, postage at the rate of 8 cents per pound must be added to catalogue prices. To peas and beans add at the rate of 15 cents per quart, and to corn 10 cents per quart.

Kale.	5	lbs	Wheat, broadcast.	1 ½ to 2	b

“PERFECTION” BROADCAST SEED SOWERS.

For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, Etc. In Fact, any kind of Seed Broadcast.

No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop.

They will Sow from 4 to 8 Acres per Hour at a Common Walking Gait.

These machines when first invented, sold for \$15 each. Valuable labor-saving, seed-saving, crop-increasing machines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a transverse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. It is the only satisfactory vibrator, which prevents the seed from clogging. They are quickly adjusted to sow any quantity desired. The grain sack holds one bushel, made strong, well finished and weighs about four pounds. It will last many years. At a round will sow wheat 50 feet, buckwheat 48 feet, flax seed 36 feet, grass seeds from 27 to 36 feet. These are the best machines ever invented for the purpose and should be in the hands of every farmer. Satisfaction guaranteed.

Price. \$2.50 Each.

THE NEW GIANT PRIZE TAKER ONION.

This is the money maker for Texas Farmers. Scores of farmers made little fortunes last year, raising this onion. It matures from seed in 90 days; very firm; good color and an excellent shipper. Thousands of bushels were shipped from Texas last year to northern markets, and on an average year will produce from 300 to 500 bushels per acre. Seed should be planted in March, four pound to the acre, in drills two feet apart. Our seed is raised for us under special contract in the celebrated St. Clair Valley, California, and all who have tried them will testify to their superiority over other onions. They often attain the weight of three pounds each.

Price, Oz.....15c. Lb.....\$2.00.
